↓ in the "manufacturer" level, when scrolling the parameters, shows the help screens.

IMPORTANT WARNINGS

The CAREL product is a state-of-the-art device, whose operation is specified in the technical documentation supplied with the product or can be downloaded, even prior to purchase, from the website www.carel.com. The customer (manufacturer, developer or installer of the final equipment) accepts all liability and risk relating to the configuration of the product in order to reach the expected results in relation to the specific installation and/or equipment. The failure to complete such phase, which is required/indicated in the user manual, may cause the final product to malfunction; CAREL accepts no liability in such cases. The customer must use the product only in the manner described in the documentation relating to the product. The liability of CAREL in relation to its products is specified in the CAREL general contract conditions, available on the website www.carel.com and/or by specific agreements with customers.

Separate as much as possible the probe and digital input signal cables from the cables carrying inductive loads and power cables to avoid possible electromagnetic disturbance. Never run power cables (including the electrical panel wiring) and signal cables in the same conduits.

Disposal of the product
 The appliance (or the product) must be disposed of separately in accordance with the local waste disposal legislation in force

tLAN, pLAN and RS485 connections and power supply

Case 1: a series of drivers is connected in a network, installed in the same electrical panel, powered by the same transformer

Case 2: a series of drivers is connected in a network, installed in electrical different panels, powered by different transformers (G0 not connected to earth).

Case 3: a series of drivers is connected in a network, installed in electrical different panels, powered by different transformers with just one earth point.

CASE 1:
230 Vac power supply with emergency module

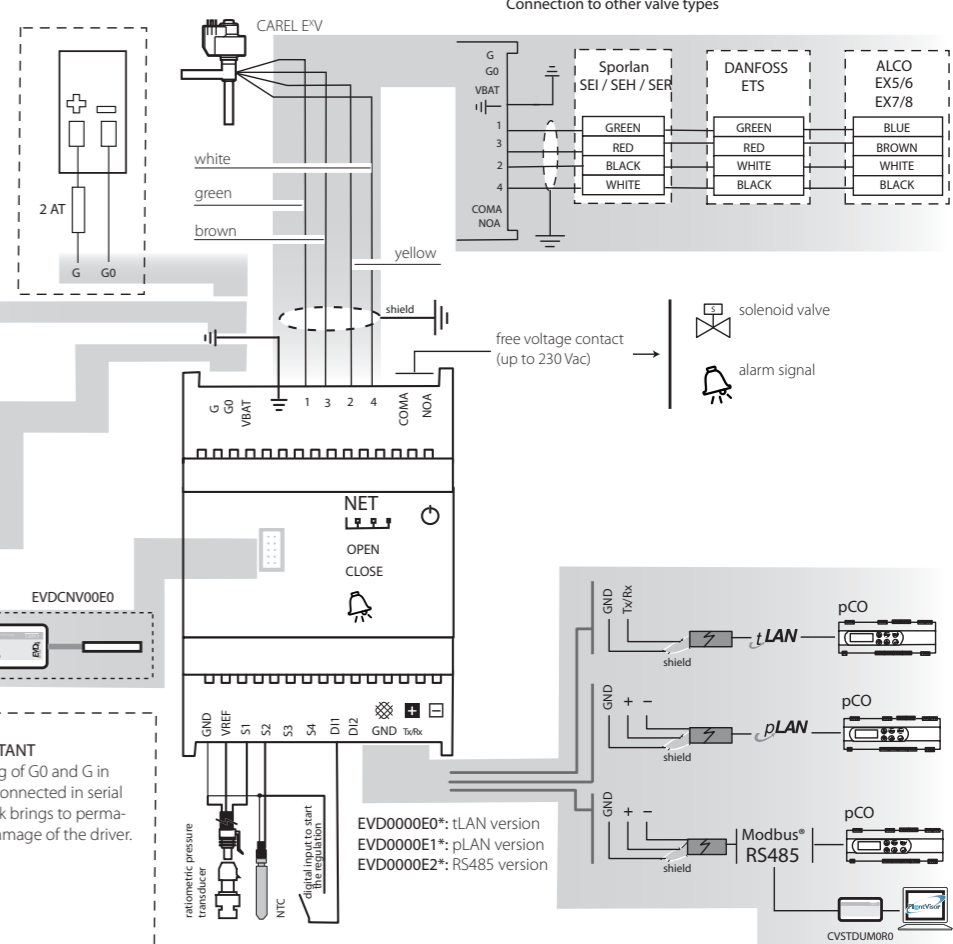

CASE 2:
230 Vac power supply without emergency module

(*) For ALCO EX7 or EX8 use a 35 VA TRADRFE240 transformer

CASE 3:
24 Vdc power supply
